3. Working Story, Processes, working, reflection, lost and found

Being Fellow of Perween Rahaman fellowship award 2014, I started work as per proposed plan on the platform of Hafeez Arain Motivational & Empowerment Trust (HAMET) and made intervention in the field to targeted localities through base line survey. Since intervention to till date, I have been completed the baseline survey of 2 union councils out of 5 UCs and the 3rd union council is in progress. The documentation of sewerage completed and the maps of both union councils with affiliated villages also completed. The community consultation ensured during working & shared the existing facilities and plans to resolve the issues with suitable low cost solution for sewerage issues, while they were aware & sensitized with the help of collected data, keeping in view their social-economic & health conditions & challenges. The all working till date reflects that there is a lot of issues of basic services, especially sewerage. Some localities have not the facility of sewerage and some have but not functional due to proper operations & maintenance.

It is observed that targeted locality (Tehsil Yazman) is a largest Tehsil of Punjab province geographically and there are scattered populated areas, which is a major difficulty to work there. The documented union councils are consisted upon 35 nos. of villages and villages have its extension populated areas. Therefore, we have been documented the 35 villages along with their maps up till now. The list of villages & detailed maps are given below.

4. Impact (tangible & intangible)

The much fruitful impact received both tangible & intangible through this activity. As mentioned above that the baseline survey, documentation and maps of 2 union councils completed along with maps of 35 nos. of villages, which is fruitful achievement within shortest period. It is find out that mostly villages consisted on open drain and some sewerage schemes abundant, while some are without sanitation. As people have dependent on government & political system and have social, technical, economic and psychological barriers. To remove the social, technical & psychological barriers, comprehensive meetings with community arranged. The existing situation of facilities of their villages shared among them and the consequences of unhealthy environment regarding health told them and also low cost solution for sewerage issues also told them. Further, to remove the political barrier, an inclusive meeting arranged with Member Provincial Assembly (MPA) to share the goal of the activity (fellowship) and up dated progress of baseline survey& documentation. The overall situation shared to him and asked to play his vital role to empower the local people through re-solving their issue of sewerage on self help basis with social & technical assistance. All the

residents of 2 union councils (35 nos. of villages) are the beneficiaries of this activity. The 136 people educated & briefed about the existing situation & plan to resolve it in both UCs through community meetings. Furthermore, in next month we identified the two educated boys (youth), who will be trained regarding survey, mapping & documentation by social & technical aspects. On the completion of this activity, the targeted people will be aware about the existing conditions and social & technical support will be provided to people to solve the minor issues on self help basis, while major issues will be shared with line departments with appropriate solution on basis of collected data.

5. Next Plan

Besides completing the remaining work, next plan is to arrange community meeting in big villages of completed UCs and to train the youth about technical & social aspects as such survey, survey, mapping & documentation. The UC master plan will be prepared and it will shared with UC administration & Tehsil Administration for it solution.

6. Whom you working with (community, organizations, universities & Govt. units)

We are directly working with local people on platform of my parent organization namely Hafeez Arain Motivational & Empowerment Trust (HAMET) through guidance of my seniors, especially Mr. Muhammad Khalid Warraich (Chairman) & support of my colleagues (Engineers & social Organizers), because as mentioned above that targeted areas are much sufficient geographically and with large numbers of villages, but it will be completed as per planned. As you know there are three stakeholders in sewerage mechanism (people, organization & line departments as service providers), therefore, we are directly work in the community to document the facts on platform of my parent Organization HAMET and it will be shared with Government department for future plan to resolve the issues.

7. Maps/ Pictures

The abstract Table of both UCs, maps of completed UCs & snaps of working is as under:

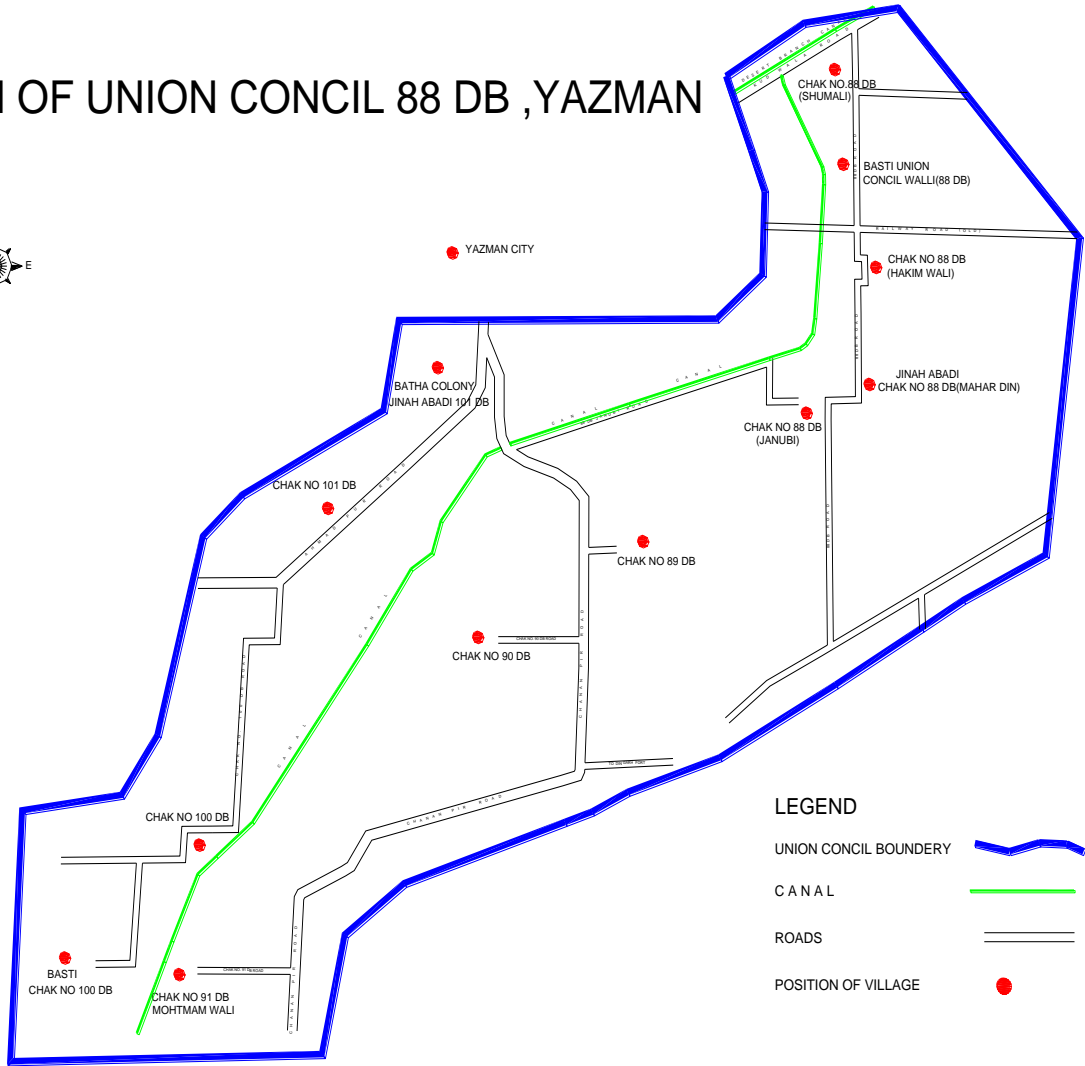

A- ABSTRACT SHEET OF UNION COUNCIL

Union Council No: 99 Union Council Name: <u>67 DB</u> Tehsil: <u>Yazman</u> District: <u>Bahawalpur</u>								
Nos. of Villages	Village Extension	Total Villages	Households		Total	Population		Total
			Village	V-Extension		Villages	Vs-Extension	
12	11	23	2456	1725	4,181	14665	10,174	24,839

B- ABSTRACT SHEET OF UNION CONCIL

Union Council No: 101 Union Council Name: <u>88 DB</u> Tehsil: <u>Yazman</u> District: <u>Bahawalpur</u>								
Nos. of Villages	Village Extension	Total Villages	Households		Total	Population		Total
			Villages	Vs-Extension		Villages	Vs-Extension
